PROFESSIONAL SUMMARY

Computer Science and Engineering graduate developing practical capabilities in DevOps, cloud infrastructure, Linux administration, and deployment workflows. Familiar with AWS fundamentals, Git/GitHub, Nginx, and networking concepts through hands-on learning and academic projects. Seeking an entry-level DevOps, Cloud Support, or IT Operations opportunity to contribute and continue building automation and infrastructure skills.

TECHNICAL SKILLS

Cloud & DevOps: AWS fundamentals, EC2, VPC, subnets, NAT Gateway concepts, EFS, DevOps lifecycle fundamentals

Linux & Networking: Linux CLI, package management, permissions, SSH, IP/CIDR, basic troubleshooting

Tools & Development: Git, GitHub, Nginx, Python, HTML, CSS

Professional Skills: Communication, problem solving, teamwork, adaptability, time management, quick learning

ACADEMIC PROJECT

TremoDraw – Parkinson's Screening Application

Developed a Python/Tkinter application for a non-invasive screening concept using spiral-drawing images and voice samples. The project uses a MobileNet-based CNN approach for image analysis and MFCC features with a voice model for audio analysis.

- Implemented patient registration, input preprocessing, prediction display, and PDF report generation workflows.
- Used Python libraries including TensorFlow/Keras, OpenCV, Pillow, librosa, and ReportLab in the project workflow.
- Focused on a clear desktop interface and organized result presentation. This is a screening prototype, not a clinical diagnostic device.

CLOUD & LINUX HANDS-ON PRACTICE

- Practiced AWS networking concepts including VPCs, public/private subnets, routing, and NAT Gateway configuration.
- Worked with EFS mounting concepts on Linux instances and NFS client setup/troubleshooting.
- Configured Nginx for serving web pages and practiced Linux user, permission, package, and SSH commands.
- Used Git and GitHub workflows for repository creation, commits, pushing code, and publishing static websites.

ASWIN A

DEVOPS / CLOUD ENGINEERING – RESUME

EDUCATION

B.Tech – Computer Science & Engineering

Graduate | Add institution name and graduation year

TECHNICAL LEARNING AREAS

- Cloud infrastructure: compute, networking, storage, access and routing fundamentals on AWS.
- Linux administration: command-line operations, services, package installation, file permissions, and remote access.
- Web deployment: hosting static pages with Nginx and publishing projects through GitHub Pages or similar platforms.
- DevOps foundations: version control, deployment concepts, scripting fundamentals, and continuous learning.

ADDITIONAL PROJECT & PORTFOLIO WORK

Personal Portfolio and Web Projects

Created and published simple HTML-based portfolio and browser game projects while learning GitHub repository management and static-site deployment.

CORE STRENGTHS

- Responsible and hardworking approach
- Quick learner with adaptability to new tools
- Collaborative mindset and clear communication
- Problem-solving and time-management skills

LANGUAGES

English | Malayalam

CAREER OBJECTIVE

To begin a career in DevOps or cloud operations, apply my computer science foundation and practical lab experience, and grow through real-world work in Linux, cloud services, deployment, and automation.

PERSONAL DETAILS

Location: Kochi, Kerala

Career Stage: Fresher

DECLARATION

I confirm that the information provided in this resume is accurate to the best of my knowledge.
